1. Introduction

Purpose

This document defines the user stories and corresponding acceptance criteria for the MindForge AI platform. The user stories capture the functional needs from the end user's perspective, while the acceptance criteria specify the conditions that must be satisfied for each story to be considered complete.

The stories are written following Agile best practices using the format:

As a *user role*
I want *desired functionality*
So that *business value is achieved*

Acceptance criteria are written using the **Given–When–Then** format.
